Features & Benefits

Envirotech, range of Aluminium Windows not only add an architectural edge to your space but also offer great performance and functionality. The windows are manufactured using premium quality material, which keeps out dust, pollution, noise, gale-force winds, and many such external factors from the interiors of your home or office spaces. They require very little maintenance, are energy efficient, and are built to last.

DUST RESISTANT

LARGE OPENING AND
AMPLE SUNLIGHT

IMPROVE HOMESECURITY

Aluminium Fixed Window

An Aluminium Fixed window is one that cannot be opened or closed. They are commonly used where light or vision alone is required rather than ventilation. They are often found in homes with high or vaulted ceilings or installed as an arched window over doors or windows. They are also used in conjunction with other openable types of window

Features:

- Cleared unobstructed view of outside
- High Energy Efficient
- Best Sound Insulation
- Keeps out rain water, dust and allows maximum sunlight

Recommended For:

All Architectural Spaces.

Applications:

Residential

Schools

Hospitals

Commercial Office

Aluminium Sliding Window

In the case of sliding windows, the shutters are movable in the frame on roller bearings. The movement is mainly horizontal based. Ease of function and increased ventilations are its main advantages. For longer openings, if more ventilation is needed, 3 track frames are also can be used.

Features:

- Low space consumption as it need no extra space when opening.
- Improved Ventilation
- Water Drainage Track for heavy rain
- Multi-track and sash options to cover larger spans
- Air-tight seals to keep out noise, dust, heat and pollution.

Recommended For:

Bedrooms, Balconies, Large/Tall Openings

Applications:

Residential

Schools

Hospitals

Commercial Office

Aluminium Casement Window

Aluminium Casement windows swing out to the side or up to open. This allows the window to be constructed of solid glass and offers a less obstructed view overall they are commonly open outwards so as to free space inside and better direct air inwards for ventilation. Many casements have fairly large glass panes to provide ample light that is uninterrupted by muntin bars or other framing. Casements also typically offer more open ventilation area than other window types.

Features:

- Double sealing to keep out noise, dust and pollution.
- Protection against rain water and dust
- Heavy Sound Insulation
- Single and Multi-point Locking Available

Recommended For:

Bedrooms, Kitchen, Study rooms, Bathrooms and AC Rooms

Applications:

Residential

Schools

Hospitals

Commercial Office

Aluminium Tilt & Turn Window

Tilt and turn windows are a highly functional and stylish window solution that combines two distinct opening mechanisms in a single frame. These windows can open in two ways—first, they swing inward like a traditional casement window using side hinges, making them easy to clean and ideal for full ventilation. Second, they tilt inward from the top while being hinged at the bottom, allowing for controlled ventilation without compromising security. In addition to their aesthetic and functional benefits, tilt and turn windows offer excellent insulation and energy efficiency.

Features:

- Offer possibility of large views
- Multi point Locking for Better Protection
- Customizable with addition of track and sash

Recommended For:

Large/tall Openings, Balconies and High-Rise Buildings

Applications:

Residential

Schools

Hospitals

Commercial Office

Aluminium Parallel Windows

Aluminium Parallel Windows are specially engineered to endure harsh weather conditions, making them an ideal choice for coastal and high-altitude regions exposed to strong winds, heavy rainfall, and salty air. Unlike traditional wooden frame windows that may warp, corrode, or deteriorate over time, parallel windows offer superior durability and long-term performance. These windows are designed to open uniformly from all sides, ensuring balanced ventilation while maintaining a secure and weather-resistant seal.

Features:

- Open in & Open OUT
- Multiple locking for more security
- Ease of movement
- Modern and elegant with great aesthetics

Recommended For:

Bedrooms, Balconies, Large/Tall Openings

Applications:

Residential

Schools

Hospitals

Commercial Office

Aluminium Casement Door

Single and double-leaf doors are suitable for opening inwards and outwards. They can be used as the main entrance door or as an additional access door to the corridors, terraces or balconies. The swing doors are available with a profile depth and can be manufactured as free-standing elements or as part of a partition wall with integrated fans and/or side lights.

Features:

- Modern and contemporary look with soft lines.
- Multiple locking options, including all-round locking
- Aluminum threshold or low threshold
- Choice of hinge type, including concealed hinges

Recommended For:

Large/tall Openings, Balconies and High-Rise Buildings

Applications:

Residential

Schools

Hospitals

Commercial Office

Aluminium French Doors

Add a touch of sophisticated charm to your property with hinged door systems that offer more character and presence than conventional sliding doors. Designed for both style and strength, these doors are available in single or double leaf configurations to suit a variety of architectural needs. Equipped with advanced features such as 3D adjustable hinges, multi-point locking systems, and shoot bolt mechanisms, these doors ensure enhanced security, smooth operation, and long-lasting performance.

Features:

- Modern and contemporary look with soft lines.
- Multiple locking options, including all-round locking
- Aluminum threshold or low threshold

Recommended For:

Large/tall Openings, Balconies and High-Rise Buildings

Applications:

Residential

Schools

Hospitals

Commercial Office

Aluminium Sliding Doors

Aluminium sliding doors are crafted with two or more sashes that smoothly glide along horizontal tracks, opening from either the left or right. This design is perfect for homes and commercial spaces where space optimization is a priority, as the doors do not require any swing clearance. One of the key benefits of aluminium sliding doors is their flexibility.

Features:

- Offer possibility of large views
- Multi point Locking for Better Protection
- Customizable with addition of track and sash

Recommended For:

Large/tall Openings, Balconies and High-Rise Buildings.

Applications:

Residential

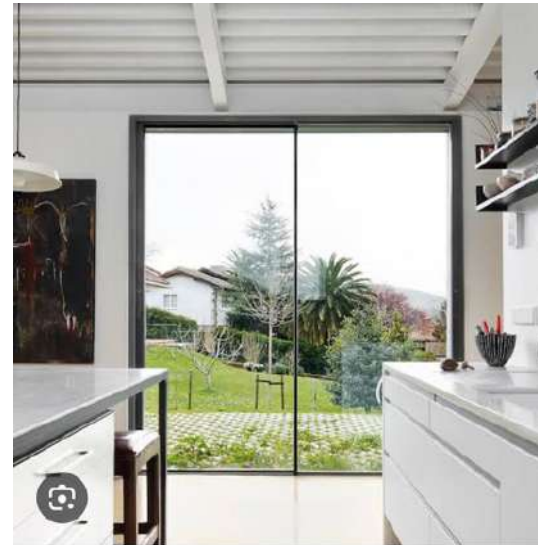

Schools

Hospitals

Commercial Office

Bi Fold Doors

If you're looking to enjoy uninterrupted views of your garden, courtyard, or outdoor space, modern sliding folding doors are the perfect solution. Designed to fold and stack neatly to one or both sides, these doors open up entire walls, creating a seamless transition between indoors and outdoors without any visual obstruction. Sliding folding doors are not only ideal for maximizing views but also offer flexible space management.

Features:

- Offer expansive opening
- Offers Unobstructed Views
- Multi Point Locking System for enhanced security
- Contemporary and stylish look

Recommended For:

Large/tall Openings, Balconies and Highrise Buildings.

Applications:

Residential

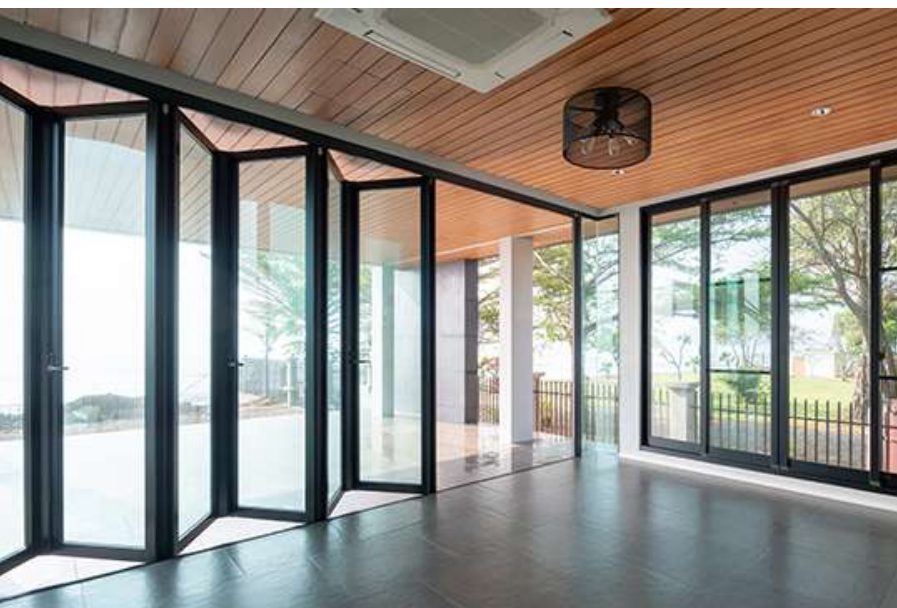

Schools

Hospitals

Commercial Office
